

AI Workflow Pack Template — Project Management Productivity

Prompt Templates & Automation Architecture for Executive Project Workflows

Workflow Name	Task Type	The Prompt	Example Output	Notes
Stakeholder Delay Notice	Summarize + Plan	Context: As a Project Management Engineer, I am facing a delay of [Duration] from a key supplier on [Project Name]. Action: Draft an update email to [Internal Team / Direct Manager]. Role: [Encouraging & Practical / Formal & Direct]. Expected Output: Clarify the cause, operational impact, and required next steps/alternatives.	Structured issue-escalation email highlighting operational risks and concrete action paths.	Strictly separate confirmed facts from unconfirmed assumptions.
Text-to-Table Converter	Extract + Summarize	Context: I manage operational project updates and have a set of scattered daily meeting notes. Action: Analyze the provided text, extract key data, and output a structured Markdown table. Role: Professional Project Manager focused on data organization and rapid triage. Expected Output: Strict 5-column table (Workstream/Item, Status, Owner/Stakeholder, Key Issue / Action Needed, Next Milestone).	Clean 5-column tracking matrix designed for instant executive scanning.	Apply a Verification Pass to eliminate hallucinated dates or owners.
Executive Brief & Decision Tracker	Summarize + Extract	Context: We have scattered outputs and notes from the beta product launch meeting. Action: Extract confirmed decisions, pending tasks, and unresolved decisions needed before next meeting. Role: Professional Project Manager focused on risk management and decision facilitation. Expected Output: Executive summary split into quick-read bullets followed by the standard 5-column table.	High-level executive brief paired with an actionable decision-tracking table.	Explicitly flag missing deadlines or unassigned owners (e.g., "TBD") without inventing dates.

Workflow Name	Task Type	The Prompt	Example Output	Notes
Overloaded Inbox Triageing	Analyze + Plan	Context: Returning from 2 days OOO with 30 unread messages and a critical launch deadline in 5 days. Action: Analyze the situation, resolve the 4 key launch decisions, and distribute action items across teams. Role: Senior Product Manager expert in crisis management. Expected Output: 4-decision resolution summary + 5-column team allocation table.	Decisive action plan preserving launch target date via Minimum Acceptable Scope (MVP).	Built on trade-off analysis while respecting hard deadlines (e.g., App Store window, press embargo).
